bremer Fully Automatic Coffee Machine VIVA 24

Microprocessor-controlled fully automatic coffee machine for producing coffee specialities such as espresso, caffè crème and filtered coffee (brewed coffee). It has 1 grinder, 1 manual input.

Design:

All major parts are made of high-grade stainless steel. Housing parts and bean container are made of easy-care plastic. Non-return valve and VDE safety temperature limit switch. The machine carries the CE mark, is suppressed (shielded) and VDE tested. Modularly designed and equipped with LON Works network standard.

Features and equipment:

With the bremer needle filter brewing process, single or double cups of filtered coffee and coffee specialities can be freshly prepared as needed. Filtered coffee is filtered without pump pressure; espresso and caffè crème are produced with a pressure of 8 bar. The coffee bean container has a large capacity of 1000 g. The coffee beans are freshly ground automatically after pressing a product button. Ground coffee and brewing water quantities can be individually set for each product.. The coffee machine also has 8 programmable product buttons.

Ground mild coffee, decaffeinated coffee and other types can be manually metered via an input chute and prepared. The height-adjustable and backward-fold-down double outlet for coffee allows you to prepare in one work process and to fill 2 cups at a time. The maximum positioning height is 168 mm and thus accommodates a commercially available glass pot or thermos jug for filtered coffee. All served beverages are shown in the display, are registered and can be called up, and are safeguarded with a PIN code in the settings menu. Dry discharge of the coffee grounds in the large grounds drawer outside the operation area.

Cleaning the coffee preparation system is done by adding a cleaning tablet and starting the fully automatic cleaning program that is part of the standard equipment.

Hourly performance:

Filtered coffee (brewed coffee)

Espresso

Caffé crème

Overall serving performance: 120-140 cups / hr.

Technical data:

Connection values: 3.5 kW, 230 V 1 N AC 50 Hz

Dimensions: 240 x 560 x 690 mm (W x D x H)
