

## Franke Coffee Systems

### The art of excellent coffeemaking

#### bremer Fully Automatic Coffee Machine VIVA 24

Microprocessor-controlled fully automatic coffee machine for producing coffee specialities such as espresso, caffè crème, cappuccino, white coffee, latte macchiato and filtered coffee (brewed coffee). It has 1 grinder, 1 manual input and integrated milk frother.

#### Design:

All major parts are made of high-grade stainless steel. Housing parts and bean container are made of easy-care plastic. Non-return valve and VDE safety temperature limit switch. The machine carries the CE mark, is suppressed (shielded) and VDE tested. Modularly designed and equipped with LON Works network standard.

#### Features and equipment:

With the bremer needle filter brewing process, single or double cups of filtered coffee and coffee specialities can be freshly prepared as needed. Filtered coffee is filtered without pump pressure; espresso, caffè crème, cappuccino, white coffee and latte macchiato are produced with a pressure of 8 bar. The milk is frothed by means of the milk frother integrated in the outlet and is served with the coffee in one work process. The coffee bean container has a large capacity of 1000 g. The coffee beans are freshly ground automatically after pressing a product button. Ground coffee and brewing water quantities can be individually set for each product. The coffee machine also has 8 programmable product buttons.

Ground mild coffee, decaffeinated coffee and other types can be manually metered via an input chute and prepared. The height-adjustable and backward-fold-down double outlet for coffee and milk froth allows you to prepare cappuccino and latte macchiato in one work process and to fill 2 cups at a time. The maximum positioning height is 168 mm and thus accommodates a commercially available glass pot or thermos jug for filtered coffee. All served beverages are shown in the display, are registered and can be called up, and are safeguarded with a PIN code in the settings menu. Dry discharge of the coffee grounds in the large grounds drawer outside the operation area.

Cleaning the coffee preparation system is done by adding a cleaning tablet and starting the fully automatic cleaning program that is part of the standard equipment. The milk line and milk frother head are cleaned at the same time.

#### Hourly performance:

Filtered coffee (brewed coffee)

Espresso

Caffé crème

Cappuccino

White coffee

Latte macchiato

Overall serving performance: 120-140 cups / hr.

#### Technical data:

Connection values: 3.5 kW, 230 V 1 N AC 50 Hz

Dimensions: 240 x 560 x 690 mm (W x D x H)
