

Franke Coffee Systems The art of excellent coffeemaking

Check card and money card systems

Check card and money card systems make it possible to operate machines without cash for custom priced products.

Procurement of the check and money card readers and the retailer card required for the readers is the responsibility of the coffee machine customer.

If you the customer would prefer to use a different check and money card system than one of those listed below, Franke Kaffeemaschinen AG must first perform a test to determine compatibility with Franke coffee machines. Installation and final testing are carried out by Franke Kaffeemaschinen AG.

Scope of delivery:

The card reader housing (as attachment or adjacent unit) and the MDB interface (collection system) are included in the scope of delivery.

Tested and compatible check card and money card systems:

- Girovend 3177
- U-key
- Legic
- Krone
- Evis
