<u>Water supply:</u>	Cold water connection G 3/8" external thread Water pressure 80-600 kPa (0.8-6.0 bar)	
<u>Water outlet:</u>	Outlet hose $\varnothing$ 16 x 2000 mm; funnel $\varnothing$ 50 with siphon	
<u>Weight:</u>	25 kg	
<u>Dimensions:</u>	Width:	225 mm
	Height:	500 mm
	Depth:	600 mm

### Special features

Automatic chocolate beverage dispenser with a 2.2 kg capacity product container. A hot chocolate beverage is made from commercially available chocolate powder that is mixed with hot water using a high-speed mixer. A metering unit that can be regulated puts a portion of chocolate powder into a mixing cup, hot water is added, and it is mixed to a creamy consistency. The result is a high-quality, lump-free hot chocolate drink.

There is a product button for a cup and a small pot. The metered quantities of chocolate powder and hot water can be individually regulated. A height-adjustable beverage outlet makes it possible to use containers up to a maximum height of 130 mm.

### Billing systems

The chocolate dispenser is connected to the coffee machine for operation with the billing system.

### Cleaning and hygiene

An automatic rinsing program cleans all beverage lines at the press of a button.
