

## Fascinatingly exceptional: Award-winning design.

Technology is as versatile as the design is harmonious. Discreet yet unmistakable. The Spectra's distinctive design and innovative materials certainly swayed the industry's professionals. What about you?

**The world of coffee is a world of enjoyment.**

For the palate, the nose and, today more than ever, the eyes, too. That's why Franke Coffee Systems has poured as much passion into the Spectra's design as into its technical subtleties. The design's narrative combines a strikingly direct style with gently flowing curves. The Spectra is also both robust and light thanks to the use of innovative materials such as Plexiglas and chromium steel. Its lighting concept is effective and yet subtle. With the Spectra, it's never a matter of "either-or"; it's always "not only but also" – which is one of the reasons why it picked up the Gold Award in the Product Design Category from the International Forum Design.
