

## Instant beverages included: Spectra I.

A classic chocolate dispenser and practical vending station in one. The Spectra I ideally rounds off your product offer, whether solo or in combination with the Spectra S or the Spectra X.

### **Modular and versatile**

In its basic version with one powder dosage unit as a stand-alone chocolate dispenser the Spectra I is the ideal complement for the Spectra S and Spectra X. Equipped with two additional dosage units for powdered milk and instant coffee it becomes a table-top vending machine in its own right.

### **A bigger offer for bigger sales**

Serve up all the latest coffee specialties! Along with a fresh espresso from

the Spectra S you'll be able to whisk up some genuine hits combined with powdered milk, chocolate powder or even strawberry flavour. Everything at the touch of a button – even in self-service operation (and of course compatible with a billing system).

### **Easy access**

The machine opens up fully from the front. This lets you carry out simple maintenance tasks yourself as

and when they are required and clean the powder dosage units without difficulty. The integrated cleaning programme ensures perfect hygiene inside the machine.

### **Module overview**

- Basic version with 1 powder dosage unit
- 2 powder dosage units
- 3 powder dosage units
- Spectra S coffee supply system
- Hot-water dispenser
