- ENB® 50 E espresso brewing system
- ENB® 50 N needle filter brewing system
- Basic operating unit
- Touch operating unit
- Vetro operating unit
- Basic colours: silver, anthracite and champagne

Settings and programming

You can now make all the important settings such as the amount of ground coffee and water and the coffee temperature as well as program new products yourself. Each setting is confirmed on the display and stored on a chip card. What's more, you can call up any data you need at any time, for instance current coffee sales.

Easy access

The machine opens up fully from the front. This gives you access to all wearing parts so you can carry out simple maintenance tasks yourself as and when you need to.

Dispenser unit / automatic dispenser height adjustment

Forget the hassle of constantly having to adjust the dispenser by hand. The dispenser now adapts automatically to the height of the container you're using, even with the double-dispenser system. After dispensing, it automatically returns to its starting position. Adaptable and sturdy. The combined dispenser head adjusts over a range of 70 to 180 mm, allowing you to use all popular sizes of containers. Simply and automatically – without having to shift the cups and glasses. The dispenser is extremely easy to dismantle and can be cleaned in a dishwasher without problem.

Automatic rinsing system

Perfect hygiene means perfect product quality. And to guarantee just that throughout the day, all you need to do is simply switch on the automatic rinsing system for the preparation unit from time to time. Before the rinsing cycle starts, the dispenser automatically lowers itself to the rinsing position near the drip tray; the work surface stays clean and is instantly available again.

Automatic cleaning programme for coffee and milk unit

Hygiene and care at the highest level. The certified ARCS® rinsing and cleaning system makes sure the machine is cleaned to perfection, day after day. That way, your coffee machine is always perfectly maintained, for top-quality coffee products.
